

Helmet bracket System

At Safe Air Diving we employ existing technologies to develop and produce state-of-the art dive systems that can satisfy all national and international legislative requirements.

Helmet Bracket System

For video camera and LED light

Helmet cam / light bracket fit all stainless-steel Kirby Morgan helmets and Bandmask, it fit all dive cams and lights that has small diameter, different POM bracket can be ordered to fit different model cameras and light.

Aluminum umbilical Rack can be designed so it fit your dive system and your helmets to ensure safety and efficiency for the diver.

Features:

- Stainless steel bracket that fit the umbilical stand to store the helmet when not in use
- Hold the camera and LED Light in correct / angle position to get a fine picture for the supervisor on surface

KM Helmet:

KM28 Bandmask:

A solid one-piece frame means that lights are perfectly aligned for the diver's point of view.

Light & camera is angled to be focused 60cm from the faceplate; ideal for inspection tasks, providing a perfect view for the supervisor
